

Attachment F

Additions and Expansions to Availability of Drugs Through the DDP

Additions

The following drugs have been added to the DDP sometime during the first two DDP program years. The drug's rank on the Top 200 list for 2000 (by dollar volume of sales in US Prescription Market) is given in parentheses.

<u>DDP Participant Company</u>	<u>Company's Product(s) Added to the DDP</u>
AHP (Wyeth)	Protonix*, Prempro (50)
Bristol-Myers Squibb	Glucophage (27), Pravachol (69), Tequin (198)
Merck	Vioxx (17)
Pfizer	Glucotrol XL (77), Geodon*
GlaxoWellcome (GlaxoSmithKline)	Trizivir*

* These new drugs do not appear in the Top 200 list for 2000, which provides the most current figures publicly available. These drugs can be expected to appear in the figures for 2002.

Significant expansion of availability

The following companies have chosen to relax ordering restrictions on valuable DDP drugs previously available in more limited quantities:

<u>DDP Participant Company</u>	<u>Company's Product(s) With Expanded DDP Availability</u>
Dupont (Bristol-Myers Squibb)	Increased availability of Coumadin and others
Merck	Increased availability of Zocor
Upjohn (Pharmacia)	Increased availability of Cleocin, Motrin, others
